# GENERAL INFORMATION

The **Combifit T-seal** is a seal composed of a stainless steel outer ring having a T-shape profile and a rubber inner ring vulcanised onto the stainless steel outer ring. The **T-seal** is designed to obtain a hygienic seal in piping connections for food and pharmaceutical processes. These locations are traditional centres for bacteria cultures and regular disassembly often is the only way to clean the unit. Disassembly is expensive and interrupts the production process. Using the **Combifit T-seal** a full Cleaning In Place (C.I.P.) is possible.

If an article is not part of our standard program, please get in touch with COMBIFIT. We are probably able to manufacture according to your needs. Drawings and molds cost € 300,= per size and will be charged only once.
